[Portfolio](#)

Junior Full Stack developer seeking a comprehensive and empowering work environment. Wanting a career experience that provides a mentorial, growth and solution oriented environment. Looking to contribute impactful work by creating development strategies, delivery execution, and establishing swift issue resolution with organized code.

TECHNICAL SKILLS

Javascript, Python, HTML/CSS, Express, React JS, Angular, Typescript, Bootstrap, MongoDB, Firebase, Redux, NgRx, RxJS, Postgres SQL, Node JS, Heroku, Surge, Git, BitBucket, Github, Material UI

PROJECTS

Phoenix US (Safeguard, UI Developer)

- Collaborating as a member of a 3-person development team, using NgRx and Angular to re-design the shop section of the web application which allows dealers to follow a checkout flow for car buyers.
- Using SCSS, HTML 5, and Material Angular UI to implement updated web portal designs on application.
- Work consuming backend APIs and establishing route protection using Router Guards for application.

Lab Genius (Brain Rain Solutions, Front-end Intern)

- Collaborated on a development team and conducted QA testing on application through video recordings
- Executed test cases under varying circumstances, tracked defects and helped troubleshoot errors
- Created and maintained excel spreadsheets with organized statuses and updates.

TinyHomeHelper (Digital Crafts, Full-Stack)

- Collaborated as a member of a 3-person development team contributed to the project through setting up firebase storage and mongodb database.
- Used React js to build out an upload component using hooks that allows users to upload their images and automatically renders the image on the page from the mongo db and firebase database storage.
- Designed the CSS of the components and used flexbox to make application mobile friendly.

Brewstr (Digital Crafts, Back-end)

- Collaborated as a member of a 3-person development team and contributed to the project by developing and implementing Postgresql database to store user-input data.
- Built a reviews table in the database, connected it to the user table by foreign key, and established controllers, and models files with Node.js to route the site to each page.
- Displayed reviews with a star rating system under user profile and brewery profile using a server side template mustache. Established views and partial files to display client side information in an organized way.

Catch Up Over Coffee (Digital Crafts, Front-end)

- Collaborated as a member of a 4-person team and contributed to the project by using Javascript to fetch and integrate APIs like Open Weather Map, affirmations and horoscopes within the website.
- Utilized HTML/CSS to design user web interface pages and optimized user experience.
- Created timer functions using javascript to refresh new information from APIs.

EDUCATION

DigitalCrafts Immersive Full-Stack Bootcamp - *Full-Stack Development Certification*

FEB 2021 - MAY 2021

Kennesaw State University - *Bachelors of Science Biology/ Conc. Biotechnology*

JAN 2014 - MAY 2019

EXPERIENCE

Brain Rain Solutions Atlanta, GA

UI Developer (Contract Safeguard)

NOV 2021-PRESENT

- I work as an Angular developer designing and implementing up-to-date user interface code for car dealership's portals.
- I work building and implementing a new car dealer portal known as Phoenix US which allows dealers to set-up insurance, add extra car protections and check-out car buyers all in one portal.
- I work on a team using Agile development strategies, project management tools, git processes and methodologies.
- I audit code to manage and identify bottlenecks of performance, ensure bug fixes, and new features arrive within a time efficient manner.
